

City Council Article Tee W. Tyler – District #4

CH Volunteers Make Good Things Happen

Just last June, I wrote the city council message for the Cottonwood Heights News Journal, thanking the more than 1,000 citizen volunteers who came out to sandbag and save their neighbors from the ravages of spring runoff flooding.

Now, in June 2011, as Yogi Berra says, "It is déjà vu all over again." The flooding is here again, and so are the Cottonwood Heights volunteers.

A great city is made of so many things: parks, businesses, schools, beautiful mountain and city views, and so very much more. For me, the top ingredient that makes Cottonwood Heights the place I want to live—my home—is the spirit of the people. And that spirit has a volunteer heart.

Cottonwood Heights' volunteers don't just show up during floods, though. Valuable, needed volunteer projects are being recognized, planned, worked on and accomplished all the time in

Cottonwood Heights. Scout troops, church groups, youth groups, and our senior citizens go out and make a difference, volunteering wherever a need exists: a meal for the sick, cleaning up a yard, and yes, even sandbagging a creek at just the right time defines our CH volunteers.

Whether they are turning out to address weather-related concerns, family crises, or just buoying up the spirits of a neighbor, CH volunteers have a knack for being at the right place at the right time. I appreciate our many, many thoughtful volunteers.

During my 16 months on Cottonwood Heights' city council, I have learned it takes many volunteers to run your city government, too. These volunteers staff the following important and needed roles for our city:

- Cottonwood Heights Planning Commission
- Cottonwood Heights Board of Adjustment

- Cottonwood Heights Youth City Council
- Cottonwood Heights Historical Committee
- Cottonwood Heights Arts Council
- Cottonwood Heights Architectural Review Committee
- Events volunteers
- Emergency Preparedness/Communications

Additionally, I feel it is important here to recognize the many parents and individuals in Cottonwood Heights who volunteer for our valued community partners:

- Canyons School District and related PTA programs
- Cottonwood Heights Parks and Recreation

Thanks to all of you volunteers! We appreciate you and recognize that you regularly are making good things happen in our community. Good going, CH volunteers!

FLOOD PREPAREDNESS EFFORTS PAY OFF

This year, Cottonwood Heights and other cities along Big and Little Cottonwood Creeks faced the potential for severe flooding. An abnormally high snowpack combined with a cool, wet spring meant that the possibility of flooding on one or both creeks was something our city and its residents needed to prepare for.

So, city leaders, city staff and personnel from Salt Lake County Flood Control, as well as residents and volunteers from all over the county spent weeks planning regional sandbag areas and events, filling sandbags, helping neighbors protect their property and possessions, watching weather predictions and

flood updates and waiting to see how the scenario would play out.

The week of June 19 saw rapidly warming temperatures and sunny

skies, leading to concerns that the creeks would overflow their banks. Sure enough, the waters began to rise and city leaders, emergency personnel, and property owners kept a close eye on the creeks and

looked for areas that might cause flooding problems.

The result? We were ready when the high waters came. Our efforts to prepare in advance of the emergency worked! The volunteers who spent so much time and effort to be ready for the potential flood accomplished their goal!

Flood stage for Little Cottonwood Creek, the area of most concern, is around 800 cubic feet per second (cfs). But despite flows of more than 900 cfs, no major flooding was reported anywhere in Cottonwood Heights. The swift waters eroded the creek banks in some areas, but as of right now

PLANNING UPDATE BY BRIAN BERNDT

Importance of master planning and the role of citizens and community groups—Part 4

“If you don’t know where you are going, it’s very difficult to get there.” This simple statement explains why careful planning is essential as a city looks to its future. In an effort to help residents understand the city planning process a little better, we have created a series of articles that takes a closer look at the function of the city’s master plan, also known as the general plan. We will also be looking at the principles city leaders use as a guide in making decisions about the general plan and how citizen input is vital to a successful process.

The general plan gives a broad framework for planning the development of the city. Its purpose is to articulate a vision for

the area and provide reasonable certainty and predictability for all stakeholders. It gives direction for positive change by indicating the scope and types of appropriate development. It also gives guidance for day-to-day decisions and measures the impact of changes over time.

There are many applications for a city’s general plan. It can give better visual definition to the city through recommended height restrictions and setbacks. It may include a plan for the regeneration of older areas, as well as outline areas of historic character and promote the preservation of the city’s historic fabric. General plans also anticipate

CONTINUED PG 5

“If you don’t know where you are going, it’s very difficult to get there.”

The above statement explains why careful planning is essential as a city looks to its future.

Canyon Centre CDA

At a public meeting on March 8 the city council, acting as the Community Development and Renewal Agency (CDRA) voted 4-1 to form the Canyon Centre Community Development Area (CDA). The formation of the CDA allows Cottonwood Heights to dedicate a portion of the future increased property tax generated by the proposed Canyon Centre project to the development of public amenities—namely a proposed park/amphitheater, parking improvements, street improvements, and nearby trails.

These improvements are intended to create more open space and to address congestion associated with accessing the canyons, especially to take advantage of their many recreational opportunities. The parking improvements are consistent with needs identified by Salt Lake County and various committees and agencies that study future traffic patterns and demands related to the canyons.

As of right now, the proposed Canyon Centre development on the approximately twelve-acre Canyon Racquet Club property near Fort Union and Wasatch Boulevards is just that—a proposal. The developer’s concept plans and drawings propose two Class “A” office buildings, two hotels with surface and underground parking, a public parking structure and a city park (possibly an amphitheatre), along with two restaurant pads and two retail shops. The project is in the planning stages only at this point in time, and there are no immediate plans to start building on the property.

The creation of the CDA does not require

Cottonwood Heights to pay funds up front or subsidize the development. Rather, the city and other taxing entities that choose to participate in the CDA would dedicate 75 percent of the incremental increase in property tax they would receive from the Canyon Centre development over the next 25 years to paying for the public amenities included in the project.

In other words, if the development moves forward, Cottonwood Heights and the other taxing agencies would not only retain the base tax funds on the current property but would also receive 25 percent of the increase in tax funds, or property tax increment. After 25 years, they would collect 100 percent of the tax increment.

By taking this approach, Cottonwood Heights and its partners in the CDA enable a higher taxable value development, which in turn generates more taxes than would be generated by an alternative development plan. Some of the taxing entities that may choose to join the CDA are Salt Lake County, Canyons School District, and the Cottonwood Heights Rec Center.

For more information regarding the financial aspect of the Canyon Centre project, including budget figures and in-depth financial analysis, please visit the Hot Topics section of the city’s website, www.cottonwoodheights.utah.gov.

Cottonwood Heights Competes For National Award In Kansas City

If you follow Cottonwood Heights on Facebook or Twitter, you may have noticed a lot of discussion about Kansas City, MO and the All-America City Award. What do those things have to do with our city?

This year, Cottonwood Heights applied to the National Civic League to be considered for the All-America City Award, which honors communities for outstanding civic accomplishments.

In our application, we discussed three areas in which our city has taken a proactive stance: the protection of open space and trails through sound land-use policies, support of our youth through the formation of the Cottonwood Heights Youth City Council, and our efforts to make sure the city and its residents are prepared in the event of a large-scale disaster.

In April, we were notified that our city was one of 23 national finalists for this prestigious award—and the only finalist from Utah. We were asked to bring a delegation from our community to Kansas City in order to give a presentation to and answer questions from the organization’s jury, who would then choose 10 cities to receive the award.

Our delegation, which consisted of members of the community, youth from the YCC, former and current city councilmen, and members of the city’s staff and police department, traveled to Kansas City in mid-June, ready to show what makes our city great.

Though we were not chosen as a top 10 winner, we take pride in the fact that our city was chosen as an All-America City finalist.

The National Civic League expressed admiration at the positive things Cottonwood Heights has been able to accomplish in its six years in existence. It was a great opportunity to

Chief Robby Russo

Chief's CORNER

CHIEF'S CORNER JULY 2011

Traffic issues are the topic about which I get the most complaints from citizens. Some say we aren't aggressive enough, and others say they see us everywhere and believe we're just generating revenue for the city. I understand that people's perspectives depend upon which corner they're standing on, but ultimately everyone just wants their family to come home safely every night.

Each traffic fatality attaches itself to my memory when I see the victims' faces and the needless loss of life. Every Easter, I remember a wonderful man delivering flowers in the company van who was hit and killed by a drunk driver on Wasatch Boulevard.

Removing mangled bodies from vehicle wreckage amid the smell of battery acid vapors, engine oils and the human body on asphalt ingrains itself upon one's psyche. But there is nothing like the burden of trying to find the right words to tell a wife her husband has died needlessly at the hands of a drunk driver. There are no scripts or magic words of comfort, just an attempt to proffer the facts folded in compassion. Police officers hate that part of their jobs, and those who portray disdain for officers who work to enforce traffic laws will not get an apology for our labors.

The mayor and council have always believed public safety is the city's highest priority and the latest numbers seem to suggest significant progress. I value our partnerships with other law enforcement agencies, MADD and the Utah Highway Safety Council. Equally as important are the legislators from our city who have always been accessible and instrumental in

giving law enforcement agencies the tools we need to make a difference. It's working!

Traffic deaths in Utah for 2010 were the lowest since 1974. This year we have had nine fewer deaths through the end of May compared to last year. There were 74 deaths through May in 2010 and this year there have been only 65, with none in Cottonwood Heights. Over the last 40 years, the month of May has averaged 26 deaths a month. Utah saw only 10 deaths in May of 2011.

It's important to recognize that there are other factors that influence these positive outcomes, such as the Highway Safety Council's PSA's, airbags and side impact crash bars in vehicles, and most importantly the cell phone progression of the 9-1-1 and EMS systems. Our paramedics and fire extrication crews are saving lives by simply responding faster and with higher skill levels.

Although traffic deaths in Utah continue to be on the decline, please remember to use your seatbelts for all passengers, especially children. An adult can't physically restrain a child because of the physics/force generated in an accident. For instance, an unrestrained 10-pound infant in a 35 mph collision weighs 350 pounds, and a 35 pound unrestrained child in a low-speed school zone accident displaces 700 pounds of force.

I urge all drivers to make smart choices when they get behind the wheel, because while Utah is seeing record lows for traffic-related deaths, there is still room for improvement towards the goal of zero fatalities.

City Council Reviews CRR Zone, Plans To Vote In August

At city council meeting on June 28, the council took public comment from developers of the Tavaci property at the mouth of Big Cottonwood Canyon and residents regarding the proposed Canyon Resort Residential (CRR) Zone. The council will vote on the creation of the zone at their meeting on Aug. 2.

The CRR zone is a city-initiated zoning change that would allow for a resort-type community, including the possibility of hotels, high-rise condos, and retail shops. It was recommended to the city council by the planning commission in August 2009.

In the time since the planning commission's recommendation, the city has been negotiating with property owners who would potentially be affected by this ordinance in order to make revisions to elements of the proposed zone that were not acceptable to the council. In addition, two new city council members have joined the city and a new planning director has been hired since the original ordinance was recommended to the council. The June 28 meeting gave the city council and staff a chance to review the original CRR zone concept before a vote is taken on the issue.

Please check the city council agendas on the website, www.ch.utah.gov, for more information as the date of the vote approaches.

Community Culture

It's your turn to see what it's like

"Over the Rainbow"

Visit the busiest and most magical Munchkinland ever! Come see the "The Wizard of Oz" at Brighton High School, August 5, 6, 8, 12, and 13. The play is produced by the Cottonwood Heights Arts Council by special arrangement with Tams-Witmark Music Library, Inc.

Dorothy, played by Makayla Connor, will sweep you away from the moment the tornado twists through Kansas, transporting the Scarecrow, the Tin Man, and the Cowardly

Lion "Over the Rainbow" to The Haunted Forest and The Emerald City.

All shows start at 7 p.m. Before August 1, tickets will be \$5 per person and \$20 per family (all members must live under the same roof). After August 1 and at the door, the price is \$7 per person and \$25 per family. Tickets can be pre-purchased at PDQ Service Center in Brighton Pointe Shopping Center (3434 East Bengal Blvd.), Whole Foods in Cottonwood Heights, at Butlerville Days and at the city offices.

Meet the characters at Butlerville Days!

Watch for Dorothy (Makayla Connor), Toto, Glinda (Shea Bunker), the Wicked Witch (Rachel Keeney), and the Scarecrow (Matt Decker) in the Butlerville Days parade! Then, come meet the characters and have your picture taken with them next to the main stage at Butlerville Days in Butler Park. For more information, check out our Facebook community page via the city website at www.cottonwoodheights.utah.gov.

BUTLERVILLE DAYS

2011

COTTONWOOD HEIGHTS PRESENTS THE SEVENTH ANNUAL BUTLERVILLE DAYS.

When: Monday, July 25th, 4-10 p.m.
Where: Butler Park, 7500 S. 2700 E.,
Behind Cottonwood Heights Rec Center.

Children's Events

4:30 - 9:00 pm..... Children's Mining activity and
Historical Scavenger Hunt

5:00 - 9:00 pm..... Children's Rides

Don't miss the biggest party of the year— Butlerville Days!

Come one, come all! Cottonwood Heights is celebrating Butlerville Days on Monday, July 25. This annual event honors the founding of our community by using the settlement's original name from 1877, when the Butler Precinct was created by Salt Lake County.

Yes, there is construction at Butler Middle School, but that won't keep the fun from happening. To make your visit effortless, please take a minute to look over the map and events calendar to understand the new layout and find your favorite activities and convenient parking.

As always, the event kicks off with the parade at 4 p.m. Bands, floats, and lots of other fun entries are scheduled to participate, and don't forget all the free candy! It starts at the corner of Fort Union and 2700 East, heads down 2700 East to Bengal Boulevard, then turns west and ends at Cottonwood Heights Elementary. Access to those roads will close at 2:30 p.m., so please plan accordingly.

After the parade, Butler Park is the place to be! There will be food booths, arts exhibits, public safety demonstrations, children's rides, face painting, a car show, contests, and free entertainment. A patriotic program and fireworks show will wrap up the evening.

WE HOPE TO SEE YOU THERE!

July 2011

Cottonwood Heights Competes For National Award In Kansas City – continued

visit with delegates from other communities across the nation and bring home ideas about how to make our city even better. We are honored to have been nominated.

We congratulate the ten recipients of the 2011 All-America City Award: South Bend, IN; Dublin, CA; Fort Worth, TX; Fayetteville, NC; Scott City, KS; Kenai, AK; Belleville, IL; Tupelo, MS; Eden, NC; and Lakewood, CO.

We also recognize the members of our city's delegation and all of the great residents of Cottonwood Heights that made this nomination possible. Thank you!

Own a security alarm?

This message is for you!

Last fall, the Cottonwood Heights city council voted to amend the city's municipal code regarding home security alarms. The code now requires all residents with security alarms to register them with the police department, and the police department began enforcing the new ordinance on April 1.

The alarm permit is free of charge. It simply contains the homeowner's information and the location of the alarm, the name of the alarm monitoring and installation companies, and an emergency contact list for police to use in case the homeowner is away.

Permit applications can be filled out quickly and easily on the city's website under the police department tab, or they can be requested through the police department. For more information, contact CHPD at 801-944-7100.

HISTORICAL QUESTION

Which Cottonwood Heights resident:

This year's Butlerville Days historical display will focus on the mining history of this area. What was one of the oldest, largest, and richest mines in Big Cottonwood Canyon?

Safety Message

Asst. Chief Mike Watson

As the summer temperatures climb, many of us open our windows as a way to help keep cool. While this is a welcome way to cool down our homes, an open second story window or balcony can pose a real danger to our young children. There have been multiple incidents recently that remind us to be vigilant in our efforts to ensure the safety of our children when around open windows and balcony doors. Follow these simple rules to prevent this tragedy from striking in your home:

DO

- **DO** lock rooms that are unsupervised.
- **DO** educate children about risks and dangers associated with windows and balconies.
- **DO** install and maintain window and door safety devices.
- **DO** ensure that safety devices have emergency release mechanisms so that they do not impede emergency escape or rescue.
- **DO** complete a safety check with your child's caregiver to ensure they understand potential dangers around windows, balconies and decks.

DON'T

- **DON'T** allow children to play near windows, balconies or decks unsupervised.
- **DON'T** keep furniture or other climbing hazards near windows or on balconies and decks.
- **DON'T** underestimate a child's mobility. Children begin climbing before they can walk.
- **DON'T** underestimate how quickly young children can learn. Children may be able to unlock doors and windows to gain access to dangerous areas without you realizing it.
- **DON'T** rely on screens as safety devices. Screens keep bugs out - not children in.

www.cottonwoodheights.utah.gov

Mountview Park: Update

During the last few months, Cottonwood Heights has taken advantage of a unique opportunity to partner with Canyons School District in the creation of a neighborhood park on the Mountview Elementary property at 1651 E. Fort Union Blvd.

Now that the school has been demolished, engineering plans are being drawn up for the park. When those are done, the city will solicit bids for construction, which is planned to start in August.

Not all of the park will be completed at once, but rather in phases. Phase one will most likely focus on infrastructure and playing fields, while a future phase (or phases) will

add more elements to park. Construction is expected to continue through the fall.

To see the final concept plan for the park, visit the Hot Topics section of our website at www.ch.utah.gov and click on "Plans for Mountview Park." You can also watch the website and future editions of the Cottonwood Heights News Journal for further updates as construction on the park progresses.

City Manager Wins Best Of State Award

On June 4, Cottonwood Heights City Manager Liane Stillman was honored at the Best of State gala for being the Best Appointed Official in Utah.

Liane was recognized for her people-oriented management philosophy, her willingness to collaborate with other entities and find best practices, and her focus on getting the city and its residents prepared in case of a large-scale emergency.

We congratulate Liane for winning this prestigious and well-deserved award!

The Premiere Recognition and Awards Program®

PLANNING UPDATE CONTINUED

the timing of development, suggesting an appropriate time frame for the development or redevelopment of various areas.

If you would like to read previous articles in this series, please visit our website, www.ch.utah.gov/get_involved.newsjournal.html.

The following is an excerpt from the Cottonwood Heights General Plan. It provides the guidelines which the city uses when opportunities to encourage economic development arise. For example, the city is in the process of creating an economic development strategic plan that looks at our economic viability five to ten years in the future. The strategy also helps the city purposefully plan for certain types of business clusters and stay competitive with other places in the region.

Support Economic Vitality

The strength of Cottonwood Heights' economy has enabled the city to provide a high level of service to its residents at a relatively low cost. In order to maintain its economic advantages, it is important to foster a balanced economic development program. We are committed to the goal of supporting our economic base, providing for the fiscal

health of the city and forming partnerships with the community which strengthens our ability to meet this goal.

Guiding Principle

The City will build on its current positive image and quality of life to maintain its position as a premiere office location in Salt Lake Valley, a regional retail hub and a residential suburb with beautiful homes. Additional amenities will be added to serve not only residents and employees in the area, but also tourists and skiers heading to Big and Little Cottonwood Canyons.

Key Assumptions

- Allowing a range of land uses in the community provides opportunities for existing businesses to grow and prosper and new businesses to locate here.
- Technology and distribution clusters are significant contributor to the local economy and capitalizes on the community assets and location.
- New and "clean" economic activities, such as medical and research, help to promote an active and sustainable economy.

Points the City considers when making decisions concerning economic development:

- Diversity of land uses
- Long-term economic growth
- Relationship of "local" to "regional" economies
- Diverse economic base
- Retain existing business opportunities
- Employment opportunities for citizens
- Enhance and maintain property values
- Promote "sustainable" economic activities
- Redevelopment
- Role as a unique retail destination
- Balance between population growth and economic growth
- High quality visual setting

July 2011

CITY COUNCIL MEETING SCHEDULE

All City Council business meetings are held in the council chambers, 1265 East Fort Union Blvd., Ste. 300. The work meetings are held in the conference room at the same address but in Ste. 250. The July meeting schedule is as follows:

- **Tuesday, July 5th**
6 p.m. Work Meeting
- **Tuesday, July 12th**
6 p.m. Work Meeting
(reconvenes following business meeting)
7 p.m. Business Meeting
- **Tuesday, July 19th**
6 p.m. Work Meeting
(reconvenes following business meeting)
7 p.m. Business Meeting
- **Tuesday, July 26th**
6 p.m. Work Meeting
(reconvenes following business meeting)
7 p.m. Business Meeting

FLOOD PREPAREDNESS EFFORTS PAY OFF

CONTINUED FROM PG 1

there has been minimal property damage reported in the city, and that damage is limited to erosion events.

No structural damage has been reported.

Debris removal, the construction of sandbag walls, and vigilance on the part of everyone in the city led to a safe and relatively problem-free spring runoff season. So what's next?

Though the worst of the flood threat is believed to be over, it is important to remain alert regarding possible problems and stay away from the fast-running water until the creeks return to a more normal flow. After that happens, we will give you information on what to do with the thousands of sandbags that are lining the creeks right now.

Again, we thank everyone who has helped us prevent flooding in the city this year: Salt Lake County Public Works, Salt Lake County Engineering and Flood Control, Unified Fire Authority, Cottonwood Heights' staff and police, and especially all the volunteers that turned out in droves to help. We couldn't have done it without you.

HISTORICAL QUESTION

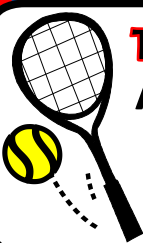

Answer To July Historical Committee Question:

The Maxfield Mine. In 1872, John Maxfield and his brother Robert (father of R. D. Maxfield, Jr.) were bringing logs out of Mill A Gulch to the sawmill they had built at it's mouth when they uncovered a vein of ore. They filed for and staked claims on what later came to be known as the Maxfield Mine.

The Maxfields were primarily lumbermen, so they traded their claims for a wagon, a team of mules, and \$80 cash. The buyer, a Mr. Price, sold the claim once more in 1879, and the Maxfield Mining Company was incorporated. The Maxfield Mine became the only regularly producing mine in the canyon. At one time, the company was shipping an average of two carloads of ore every month with a workforce of twenty men. By 1906, more than \$1 million in high-grade silver-lead ore had been taken from the mine.

Had the Maxfields been able to foresee this, it might have convinced them to change their occupation.
